

NEW

S-HP/HP-15-B

Watts Series HP/HP-15

BRONZE Boiler Trim Packages

Includes

- 1/2" FV-4M1
- 1/2" SCV (2)
- 1" or 1 1/4" AS-B
(solder or threaded ends)
- 1/2" ET-30 or 1/2" ET-15
- 1/2" B911S

The Best Way to Simplify Your Next Boiler Installation with Quality Components from Watts!

Convenient

The easy to carry HP package contains the essential trim components of a quality boiler installation in a single box

Bronze Components

The new HP package contains quality Watts components ... including the new AS-B Bronze Air Scoop and the B911S Combination Bronze Fill Valve and Backflow Preventer.

Quality

Provide your customers with a quality installation using hydronic components you know you can depend on heating season after heating season.

Plus

We have included something EXTRA ... the new Watts 1/2" Model SCV Service Check Valves! These valves facilitate inspection of system components while maintaining system integrity. The spring loaded valve closes as the component is removed from the system, eliminating the necessity of draining the system.

The next time you are preparing for a hot water boiler installation, why not keep it simple? Pick up the new Bronze HP Hydronic Package from Watts ... the name you trust for quality, reliability and durability.

In fact, pick up a few HP packages! They are not only convenient for installation but they will also come in handy on those emergency repair jobs. You will have every essential boiler component in one place, one box ... not all over your truck!

See reverse side for available models.

"Another Innovation from Watts"
